

Inflation Device Kit

Anvisa: 80174309013

The inflation device is designed to inflate and deflate PTCA balloon or other interventional accessories, also monitor pressure during PTCA operation.

Models

MODEL	(ATM)	VOLUME
AI25	30	20ml

Seldinger Needle

Anvisa: 80174309015

The SELDINGER Needle is designed to build percutaneous access during diagnostic and therapeutic procedures. It is indicated as a sharpened needle tip for less penetration force in diagnostic and therapeutic procedures.

Models

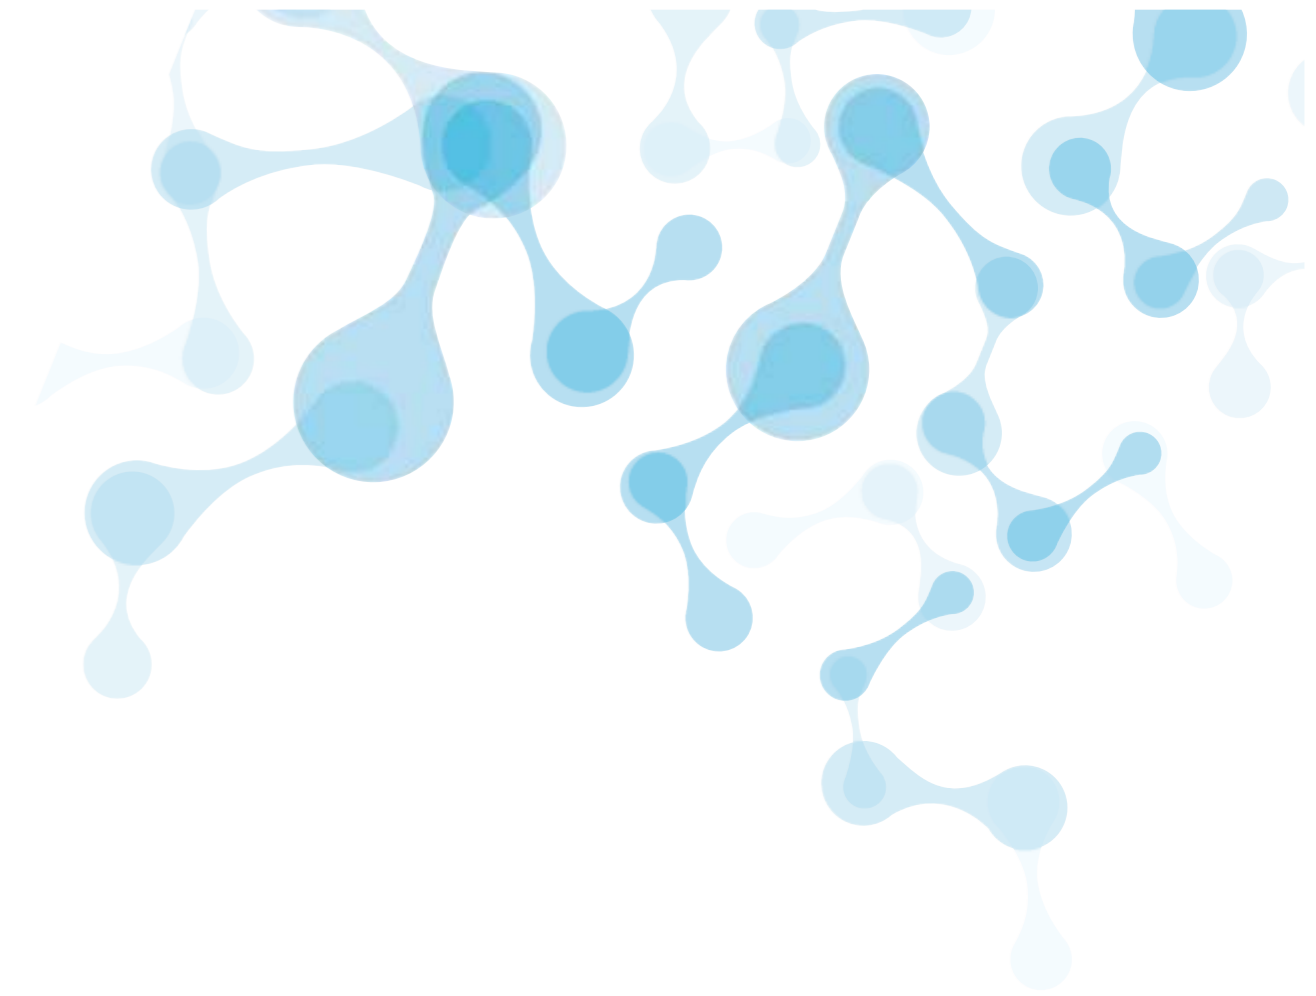

Ref.	Gauge	Needle Diameter (mm)	Length (mm)
SN03	18	1.20	70 with wings
SN03A	18	1.20	70 without wings
SN06	21	0.80	45 without wings

Introducer Kit For Catheter

Anvisa: 80174309014

The Introducer Kit is used for insertion of percutaneous catheters into the peripheral system, and may be via femoral or radial.

- Smooth transition from dilator to sheath, reduces puncture resistance and provides easy, non-traumatic insertion;
- Folds and is flexible without breaking;
- Minimizes the possibility of damaging fabric by inserting, advancing or removing the sheath. Provides smoother vessel access even through hard-to-reach locations;

Manifold

Anvisa: 80174309016

Manifold is indicated for the directional control of fluid material and to provide access ports for the administration of solutions. The most common use includes pressure monitoring, intravenous fluid administration, and transfusion.

- Ports: 2/3/4
- Pressure: 500 psi
- Type On
- Sterilization: ETO

Models

MODEL	PORTS	PRESSURE
AM0201	2	500 psi
AM0301	3	500 psi
AM0401	4	500 psi

Transradial Pressure Bandages

PB04A	24CM
PB04B	27CM

High Pressure Tubing

Anvisa: 80174309011

- High-pressure transparent material.
- Material: Polycarbonate, Polyamide, Polyurethane and Silicone.
- 1200 psi pressure resistance (with rotating connectors): 30cm, 60cm, 90cm, 120cm, 150cm, 180cm.

Models

MODEL	PRESSURE	LENGHT OF TUBE (CM)
PMT0501	1200 psi	30
PMT0502	1200 psi	60
PMT0503	1200 psi	90
PMT0504	1200 psi	120
PMT0505	1200 psi	150
PMT0509	1200 psi	180

Y Connector Kit

Anvisa: 80174309012

The Y Connector Kit is a Disposable Interventional Accessory. The Kit comes with a 1 Y Connector, 1 Insertion Tool and 1 Torque Device. The Insertion tool is capable of directing the Guide Wire when inserted protecting the vascular system against ruptures. The Torque Device is used to rotate the already inserted Guide Wire, facilitating the surgical procedure performed by the physician.

- Body Material: Polycarbonate
- Sterilization: ETO
